

GALAXY INTEGRATIONS: WIRELESS LOCKSETS

Wireless locks are a great compliment to Galaxy's access control system. They can be used for installations where pulling cable proves difficult or in locations requiring restricted access and auditing. Galaxy's integrated solution allows access management and reporting to be completed from a single interface.

SYSTEM GALAXY HARDWARE

635 DSI-Serial Board
(2) RS-485 Channels
Up to (16) AD-400 Locks/Channel

600 Series Door Controller

PIM #1

- CPU supports up to 64 locks
- (1-16) Locks(AD400) and (PIM) per 485 Channel
- Self Contained: Card reader, Lock, Contact, REX, Battery Pack

BENEFITS:

SECURITY

- Electronic locks allow auditing and control
- Reads high security smart (13.56 MHz) as well as proximity (125 kHz) credentials

Hub

- CPU supports up to 64 locks
- (1-16) Lock per 485 Channel, each hub supports up to 8 locksets
- Self Contained: Card Reader, Lock, Contact, REX, Battery Pack

EFFICIENCY

- Drastically reduce install time
- Get door and battery status
- Use wireless to reduce cabling requirements

Router

Node

- CPU supports up to 64 locks
- Up to 16 Locksets per Router/DSI
- Up to 8 Locksets per Node
- Self Contained: Card Reader, Lock, Contact, REX, Battery Pack

CONVENIENCE

- Works with same credential used on the building perimeter
- Smart credentials can be used for vending and other applications
